S. Ankem, C.S. Pande, I. Ovid?ko, and R. Ranganathan, editors

These proceedings from the 2002 TMS Annual Meeting will present current research and developments on interfaces in a variety of materials ranging from advanced nanostructured materials to high Tc superconductors. Special attention will be given to the effect of interfaces on the unique, highly desirable properties of advanced materials, with an assessment of current status and future direction. The book will act as a source, for both researchers and graduate students, of the latest knowledge on the role of interfaces in advanced materials for research and design.
